Answers

1. The Pyramids of Giza were built as tombs for pharaohs.
2. The pyramids were built for the pharaohs, who were the rulers of Egypt.
3. The three largest pyramids at Giza were built for Khufu, Khafre, and Menkaure.
4. The Great Pyramid of Khufu is over 480 feet tall.
5. The ancient Egyptians used ramps, sledges, and levers to move the stone blocks into place.
6. The stone blocks were transported from the quarries to the building site using a system of canals.
7. Visitors can explore the interior of the pyramids, ride camels or horses around them, and take in the view.
8. The Pyramids of Giza are considered remarkable achievements due to their size, age, and the engineering techniques used to construct them.
